 - Engaged in Microsoft Learn training with a focus on front-end development.
 - Promoted peer collaboration and tech advocacy within the student tech community.
-

PROJECTS

MiDLancer – Back-End Developer – ThreeDos

(Jul 2024 – Aug 2024)

- Contributed to the development of a web platform designed to connect Arab freelancers with job opportunities, inspired by LinkedIn.
- Built core back-end features using PHP and managed relational data with MySQL, including user registration, login, profile handling, and job posting functionality.
- Collaborated with a front-end team, ensured data flow and integration, and used Git for version control in a team-based environment.

Organizo – Task & Sprint Management Website – Back-End Developer – Threedos

(Jul 2024 – Aug 2024)

- Developed the back-end of a task management platform inspired by Taskify, designed to help users organize tasks, plan sprints, and track progress.
 - Implemented core functionality in PHP and used MySQL to manage task data, sprint planning logic, user roles, and deadlines.
 - Worked collaboratively in an agile team using Git for version control, and contributed to a polished final product that won 1st place in the Threedos competition.
-
